Description

The 24505 Series Battery Disconnect Switch Lockout Lever Kit allows you to use a padlock (not included) to securely lock a Cole Hersee brand lever-actuated metal case master battery disconnect switch in the OFF position. Disconnect switch lockout is required for certain applications to comply with lockout/tagout safety regulations.

These lockout/tagout kits include a steel switch lockout bracket and a die-cast lever. They are available in a metallic version as well as red, yellow, and chrome powder-coated finishes, which makes it simple to color-code switches by function or application by using different-colored lockout lever kits.

In addition, these manual battery disconnect lockout/tagout kits are available in versions that accommodate a 7 mm or 7.9 mm lock shackle size for different-sized padlocks.
